

## PLASTIC HOPPER FEEDER with metal central rod and nylon horizontal rod

*The large anti-waste feeder*

**Versatile** and **reliable**, as required by people using hopper feeders, ARCUS MAGNA is the perfect tool to feed your animals **simply** and **without waste**.

The **anti-waste fins** (whose design is registered) have been expressly designed to allow the animals to eat in a correct way, while preventing them from using their beak to spill the feed from the tray. Feed saving will be the immediate result, as well as a cleaner litter. Unwanted animals will not find feed on the ground anymore.

The **metal rod** allows several regulation levels of the feed quantity in the tray. The regulation is made by a split pin that fixes the plastic cylinder at five different heights.

What changes from the existing models? The feeder has been developed to feed large-headed and adult animals, specifically layers. For this reason, the tray has a larger diameter than the ARCUS and ARCUS GYRO models.

### PRODUCT DETAILS

#### Anti-waste fins

Integrating parts of the plastic cylinder

#### Metal and nylon rods

The split pin allows five different height regulations, according to the type of feed (in pellet or flour)

#### Double reinforcement

Two conical metal reinforcements are included in the feeder kit which improve and strengthen the coupling between tray and rod

# ARCUS MAGNA FEEDER

- Tray, cylinder and lid in long-lasting, high quality plastic
- Possibility to adjust the feed quantity in the tray
- Designed expressly to optimise the volumes when cylinders and trays are piled (storage and shipment)
- The hole at the top of the rod allows to hang the feeder
- Double conical metal reinforcement to fix the rod to the tray
- Specially designed for adult animals such as layers

## TECHNICAL DATA

	Code	Bar code	Capacity	Dimensions	Weight	Animals/ feeder
	2122	8068057261456	20L	52,7x44,2cm	1,89kg	10 pullets

## TECHNICAL CHARACTERISTICS

- Plastic **body**
- Metal **vertical rod**
- Nylon **horizontal rod**, a resistant and supporting plastic material
- **Pieces per carton:** 5 pcs
- **Pallet 120x80x240cm:** 50 pcs
- **Pallet 120x100x240cm:** 80 pcs
